RE: EZSPEC/DARGAL Version 60.450

This document accompanies the distribution media for DARGAL Version 60.450.

Qualified later compiled code versions:

DARGAL is now being compiled at code file versions 48 through 51. This makes DARGAL compatible with MCP versions up to 52. If you are generating DMS FDs up to version 52, all required libraries (OBJECT/DARGAL/FDFROMDMS) are also included with this release.

The following general enhancements have been made to the URSA *infoSuite*:

- Improved ability in handling SQL FD data and processing SQL data more efficiently
- Enhanced processing of SQL-to-SQL joins and DMS-to-SQL joins
- Improved ability within URSA to process selection on non-primary file fields within a join file
- Expanded size displacements in the paragraph report
- Ability to suppress SAVEBACKUPFILE warning messages to SYSTEM/MESSAGES (MCP Levels 51 or greater)

If you have any questions about DARGAL Version 60.450, please contact Client Support at 704-845-1000 or cs@decisionsupport.com

Thank you.

Sincerely,
The Decision Support Client Support Team
