

February 4, 2008

Decision Support is pleased to announce the release of DARGAL 60.470 to the client community users of DARGAL, EZSPEC, URSA, and UniStar.

This release contains the latest enhancements to the product and is fully compatible with UNISYS MCP 52.

The release has been compiled at MCP 51; if you require the release compiled at a lower MCP version, please let us know.

As always, the upgrade is at no additional cost to you and is available via FTP transfer from [www.decisionsupport.com](http://www.decisionsupport.com) or by a traditional CD delivery. Just let us know your preference.

If you have any questions or concerns regarding this release, please feel free to contact us at [cs@decisionsupport.com](mailto:cs@decisionsupport.com)

Thank you,

Nancy King  
Client Services Manager
